

SMILE KISAN

DEVOPS ENGINEER | CLOUD ENGINEER | AWS • KUBERNETES • TERRAFORM

smilekisan.dev@gmail.com | [+9779847613598](tel:+9779847613598) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL PROFILE

DevOps Engineer with 1.5+ years of hands-on experience building and automating AWS cloud infrastructure, CI/CD pipelines and containerized workloads. Strong in Infrastructure as Code with Terraform, containerisation with Docker and Kubernetes, CI/CD automation, Python/Bash scripting, and observability with Prometheus and Grafana. Experienced in improving deployment consistency, reducing operational toil, supporting high-availability environments and collaborating across engineering teams. Seeking DevOps, Cloud, Platform Engineering or SRE opportunities in Lithuania.

CORE TECHNICAL SKILLS

Cloud & AWS	EC2, VPC, IAM, S3, RDS, ECS, ECR, Lambda, API Gateway, CloudWatch
Containers	Docker, Kubernetes
CI/CD	Jenkins, GitLab CI/CD, AWS CodePipeline, CodeBuild, CodeDeploy
Infrastructure as Code	Terraform, Ansible
Programming & Automation	Python, Bash, Node.js
Version Control & Collaboration	Git, GitHub, GitLab
Observability & Security	Prometheus, Grafana, CloudWatch
Systems & Data	Linux, Windows, PostgreSQL, MySQL
Engineering	REST APIs, distributed systems, cloud-native architecture, scalability, reliability

TECHNICAL EXPERIENCE

Crew Member | Hunky Dory Restaurants Ltd, United Kingdom

11/ 2022 – 02/2026

- Worked in a fast-paced, customer-facing environment, demonstrating strong teamwork and communication skills.
- Managed multiple responsibilities efficiently while maintaining high service standards.
- Developed adaptability, time management, and problem-solving skills in a dynamic setting.

Software Engineer / DevOps & Infrastructure | Terakoya Academia, Nepal

12/2020 – 09/2022

- Progressed from Intern to Software Engineer and subsequently to Infrastructure Team Lead / DevOps Engineer, taking responsibility for cloud infrastructure, automation and deployment workflows.
- Designed and automated AWS infrastructure across EC2, VPC, IAM, S3, RDS, ECS, ECR, Lambda and API Gateway, supporting reliable production deployments.
- Automated AWS infrastructure provisioning with Terraform and Ansible, improving environment consistency and reducing manual deployment effort.
- Developed CI/CD workflows using GitHub Actions, Jenkins and GitLab CI/CD, with emphasis on automated build, test and deployment stages.
- Containerized applications with Docker and worked with Kubernetes workloads, scheduling, deployments, services and cluster-level troubleshooting.
- Worked with microservice architecture and REST APIs, including implementation of rate limiting to improve API resilience and service protection.

- Implemented monitoring and operational visibility using Prometheus, Grafana, AWS CloudWatch and CloudTrail.
- Used Python and Bash to automate repetitive operational tasks and support infrastructure and deployment workflows.
- Applied AWS IAM and CloudTrail concepts to improve access control, auditing and cloud security visibility.

PROJECTS

AutoDeploy — Multi-Service DevOps Automation Platform

Personal Project / Current

- Designed and built a 7-service microservices platform with service-specific databases and signed service-to-service authentication.
- Built a GitHub App-integrated pipeline that analyses repository dependencies and automatically generates Docker, CI/CD, Kubernetes, Terraform and Ansible configurations tailored to each project.
- Engineered zero-downtime SSH deployments with pre-deployment health checks, nginx traffic switching and automatic rollback on failure.
- Implemented staging → production promotion using the exact tested Docker image, semantic versioning and container-registry artifact verification.
- Secured the platform with AES-256-GCM credential encryption, organization-scoped RBAC, audit logging and rate limiting; also built self-hosted CI/CD to automatically rebuild and redeploy all seven services.

LearnInclusive — Accessibility-First Cloud LMS

Personal Project / Current

- Designed an accessibility-first LMS for schools using React, TypeScript, Supabase and PostgreSQL, supporting students, teachers, parents and administrators.
- Designed role-based access control using Supabase Authentication, PostgreSQL Row Level Security and Storage.
- Designed accessibility features including captions, voice navigation, dyslexia-friendly learning interfaces and multilingual support.
- Planned containerized cloud deployment and Infrastructure as Code for repeatable, scalable multi-school environments.

EDUCATION

M.Sc. Advanced Computer Science — Distinction | Cardiff Metropolitan University, United Kingdom | Awarded 2023

B.Sc. Computing (Hons) — First Class | Leeds Beckett University / The British College | Awarded 2019

Level 5 Diploma in Computing | NCC Education | Awarded 2017

Level 4 Diploma in Computing | NCC Education | Awarded 2016
